This report provides stakeholders with updates on GreenPower. The first section of the report provides information about GreenPower. This is followed by breakdowns of GreenPower sales by each Provider.

The period covered in this report is the fourth quarter of the 2025 Settlement Period for GreenPower from 1 October to 31 December 2025.

The quarterly reports are not audited records and therefore should be treated as interim results. For audited customer numbers and sales, please refer to the annual audit reports published at [www.greenpower.gov.au/about-greenpower/audits-and-reports/annual-audits](http://www.greenpower.gov.au/about-greenpower/audits-and-reports/annual-audits)

This report, as well as additional information about GreenPower, is available on the GreenPower website at [www.greenpower.gov.au](http://www.greenpower.gov.au)

## Executive Summary

### Quarter in review: Q4 2025: 1 October to 31 December 2025

GreenPower Products were offered by 41 GreenPower Providers nationally in Q4 2025.

The figures contained in this report are unaudited and may be subject to change. Final audited figures are published in the annual audit report each year. The annual audit report for 2025 will be made available on the GreenPower website later in 2026.

Below is a breakdown of total GreenPower customer numbers and GreenPower sales (MWh) made in Q4 2025. They are broken into sales between residential and business customers, and by the state or territory where GreenPower customers are based.

## About GreenPower

GreenPower matches your electricity use with 100% accredited renewable electricity and can be purchased by households and businesses through most Australian energy retailers and a range of other GreenPower Providers. The National GreenPower Accreditation Program is managed by the NSW Government on behalf of the National GreenPower Steering Group, a collaboration of Australian state and territory governments.

### GreenPower Providers and Products

Most energy providers throughout Australia offer at least one accredited GreenPower Product. Residential and business customers can choose to buy an accredited GreenPower Product offered by any GreenPower Provider which is approved to sell GreenPower in their state or territory.

A list of GreenPower Providers and their approved GreenPower Products is available on the GreenPower website at [www.greenpower.gov.au/get-greenpower/find-provider](http://www.greenpower.gov.au/get-greenpower/find-provider)

The three main types of GreenPower Products offered are:

1. **consumption-based products** where the customer nominates the level of GreenPower purchased according to a nominated percentage of their total electricity consumption. Consumption based products are part of the customer's electricity retail contract.
2. **'block' based products** where the customer purchases a fixed kWh block of GreenPower that is not directly linked to their consumption. For residential customers, the minimum block is the equivalent of 10% of average household electricity consumption as defined in the [GreenPower Program Rules](#). Block based products are part of the customer's electricity retail contract.
3. **'decoupled' GreenPower** generally for business customers that wish to purchase GreenPower separately to their electricity contract. A GreenPower Provider can be contracted to purchase and surrender the equivalent number of GreenPower Large-scale Generation Certificates (LGCs) from eligible generation sources to meet the customer's electricity consumption, or for a proportion of the total consumption.

## Rules of the Program

The *National GreenPower Accreditation Program Rules* set stringent requirements for all GreenPower Providers offering an accredited GreenPower Product. A key requirement is for GreenPower Providers to source all generation included in a GreenPower Product from accredited GreenPower Generators.

The National GreenPower Accreditation Program Rules are published on our website at [www.greenpower.gov.au/documents/greenpower-program-rules](http://www.greenpower.gov.au/documents/greenpower-program-rules)

## GreenPower Generators

Under the National GreenPower Accreditation Program, a GreenPower Generator is defined as a renewable electricity generator, that has been accredited by GreenPower in accordance with the eligibility requirements under the Program Rules. A description of the major generator types is provided in section 2 of the Program Rules.

For a list and an interactive map of GreenPower approved generators, please visit the GreenPower website at [www.greenpower.gov.au/our-impact/our-generators](http://www.greenpower.gov.au/our-impact/our-generators)
